

AMENDMENTS TO THE SPECIFICATION

Please replace paragraphs [0020] and [0021] with the paragraphs that follow:

[0020] Specifically, the front glass substrate 1 is provided with a plurality of rows of grooves (~~not shown~~) for reinforcement of the glass substrates. At this time, the grooves are formed in the predetermined portions except the circumference of the front glass substrate and the portion for forming members such as cylindrical electrodes. Also, a fluorescent substance (not shown) is coated on the inner surface of the front glass substrate except the circumference.

[0021] The rear glass substrate 2 is provided with a plurality of rows of grooves (~~not shown~~) in parallel. At this time, the grooves are formed in the predetermined portions except the circumference of the rear glass substrate and the portion for forming members such as the cylindrical electrodes. Also, a fluorescent substance (not shown) is coated on the inner surface of the rear glass substrate except the circumference.
